Report cost: 1 DRS credits

Search

**Domains & Subdomains Discovery Lookup** allows you to identify all domains and subdomains that contain all the **Include terms** and **none of the Exclude terms**. You can discover **domains only**, **subdomains only**, or **both**. Also, you can specify where the search term should be placed in the domain name: **start with**, **end with**, **contains**, **contains the word**, to narrow down the results according to your needs.

Domains & Subdomains Discovery Lookup allows you to identify all domains and subdomains that contain all the **Include terms** and **none of the Exclude terms**. You can discover **domains only**, **subdomains only**, or **both**. Also, you can specify where the search term should be placed in the domain name: **start with**, **end with**, **contains**, **exact match**, to narrow down the results according to your needs.

The output result is limited to 10,000 terms.

The screenshot displays the 'Domain Research Suite' interface. On the left is a dark sidebar with navigation links under 'Search tools' and 'Monitoring tools'. The main area shows a search results page for 'Domains & Subdomains Discovery'. At the top, it indicates 'DRS credits available: 357,291' and a 'Purchase now' button. Below this, a 'Report cost: 1 DRS credits' is shown next to a red 'Search' button. A yellow box highlights '10,000 domain(s) having your specific search terms found', with an 'Export CSV' button to the right. The results are presented in a three-column grid of domain names, each with a right-pointing arrow. At the bottom, there is a 'Show' dropdown set to '30' and a pagination bar showing '1 2 3 4 5 ... 334'.

Search

For Domains only and Subdomains only searches the interface looks the same, except that for the type **"Both"** you set several search terms for the domain and subdomain at the same time.

The screenshot displays the 'Domain Research Suite' interface. On the left is a dark sidebar with a list of tools: Reverse WHOIS Search, WHOIS History Search, WHOIS Search, Reverse DNS Search, Domain Availability Check, and Domains & Subdomains Discovery (which is highlighted). Below these are monitoring tools: Domain Monitor, Registrant Monitor, and Brand Monitor. The main content area is titled 'Domains & Subdomains Discovery' and includes a green checkmark icon and the text 'Find domains/subdomains containing specific search terms in their hostnames.' Below this, there are radio buttons for 'Domains only', 'Subdomains only', and 'Both' (which is selected). To the right of these is a date picker labeled 'Added since' with a calendar icon and a text input field containing 'optional'. Further down, there are two sections for search terms. The first section, 'Domain search terms', has a text input field with 'Included search term', a dropdown menu set to 'Contains', a help icon, and a red 'Include' toggle switch. Below this is an 'Add term' button with a plus icon. The second section, 'Subdomain search terms', has a text input field with 'Included search term', a dropdown menu set to 'Exact match', a help icon, and a red 'Include' toggle switch. Below this is another 'Add term' button with a plus icon. At the top right of the main area, there is a green button labeled 'Purchase now' and a notification bubble that says 'API integration available. Web tool tutorial'.

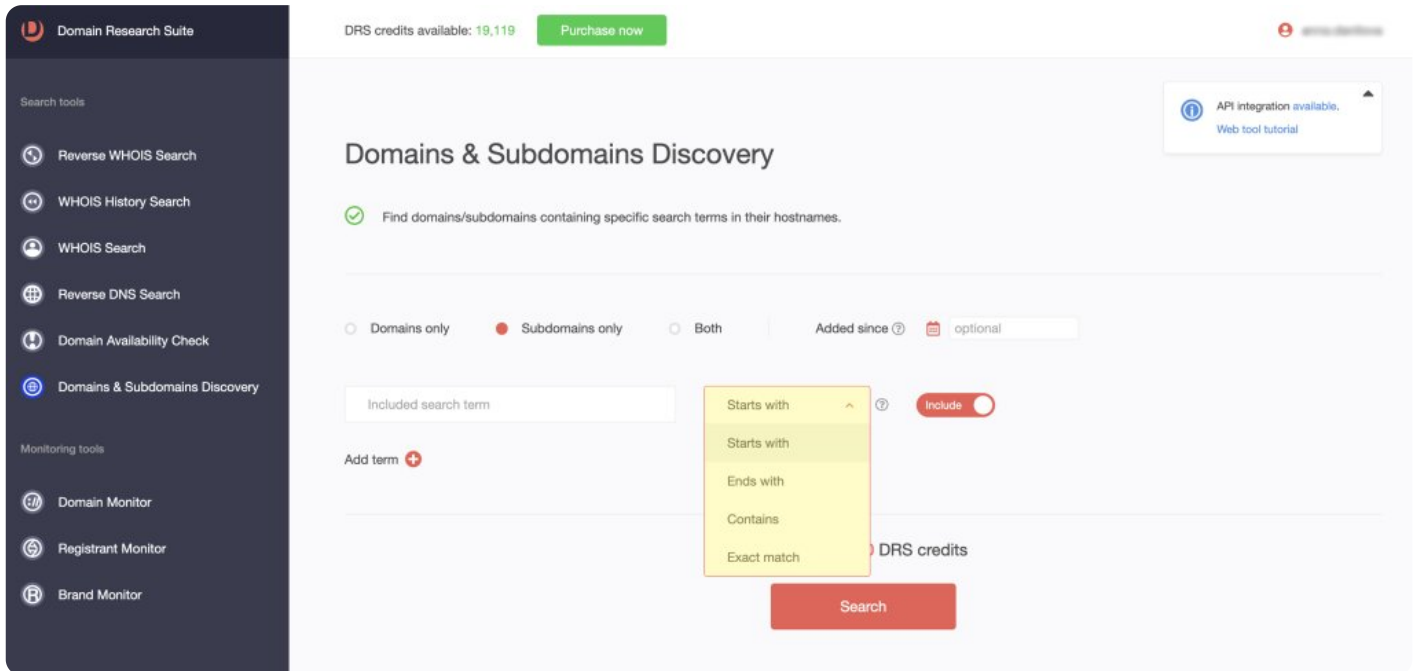

## Search Terms Options

For every search term, you can set the type and state.

### Search term types

- **Start with** - domain/subdomain starts with this term (search term\*)
- **End with** - domain/subdomain ends with this term (\*search term)
- **Contains** - domain/subdomain contains this term (\*search term\*)
- **Exact match** - domain/subdomain exactly matches this term (\*search term\*)

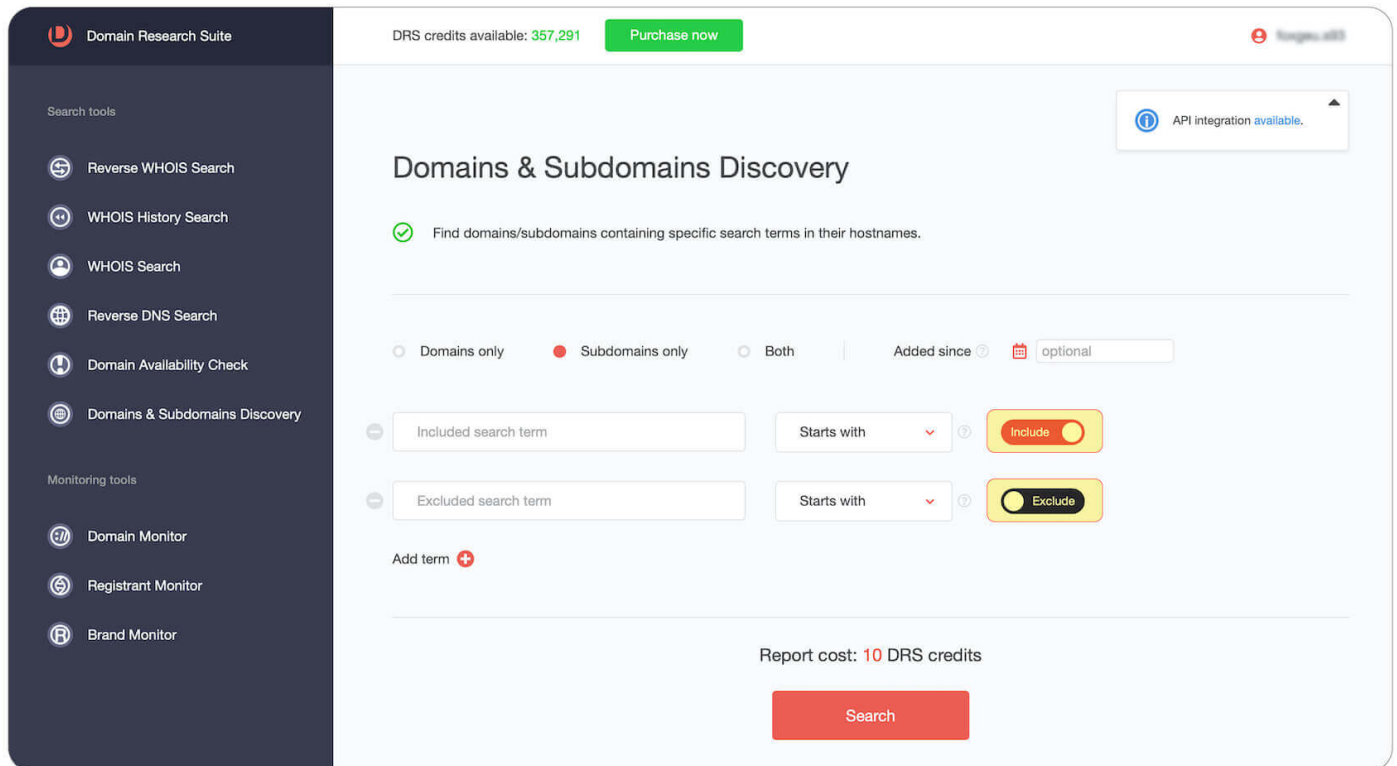

The screenshot displays the 'Domain Research Suite' interface. On the left is a dark sidebar with a 'Search tools' section containing: Reverse WHOIS Search, WHOIS History Search, WHOIS Search, Reverse DNS Search, Domain Availability Check, and Domains & Subdomains Discovery (highlighted). Below this is a 'Monitoring tools' section with: Domain Monitor, Registrant Monitor, and Brand Monitor. The main area is titled 'Domains & Subdomains Discovery' and includes a green checkmark icon and the text 'Find domains/subdomains containing specific search terms in their hostnames.' Below this, there are radio buttons for 'Domains only', 'Subdomains only', and 'Both'. To the right is an 'Added since' field with a calendar icon and the word 'optional'. A text input field labeled 'Included search term' is present, with a dropdown menu open showing options: 'Starts with' (selected), 'Starts with', 'Ends with', 'Contains', and 'Exact match'. To the right of the dropdown is an 'Include' toggle switch. Below the input field is an 'Add term' button with a plus icon. At the bottom right, there is a 'Search' button and a 'DRS credits' label. A green button labeled 'Purchase now' is at the top right, next to the text 'DRS credits available: 19,119'. A small notification box at the top right says 'API integration available. Web tool tutorial'.

## Search term state

- **Include** - all domains/subdomains should include the search term.
- **Exclude** - every domain/subdomain with the given search term will be excluded from the search result.

The screenshot shows the 'Domains & Subdomains Discovery' interface. On the left is a dark sidebar with 'Domain Research Suite' and a list of tools: Reverse WHOIS Search, WHOIS History Search, WHOIS Search, Reverse DNS Search, Domain Availability Check, Domains & Subdomains Discovery (selected), Domain Monitor, Registrant Monitor, and Brand Monitor. The main area has a header with 'DRS credits available: 357,291' and a 'Purchase now' button. Below the header is a 'Domains & Subdomains Discovery' section with a green checkmark and the text 'Find domains/subdomains containing specific search terms in their hostnames.' There are radio buttons for 'Domains only', 'Subdomains only' (selected), and 'Both'. An 'Added since' field with a calendar icon and the word 'optional' is next to it. Below these are two search term input fields. The first field is labeled 'Included search term' and has a 'Starts with' dropdown and an 'Include' button. The second field is labeled 'Excluded search term' and has a 'Starts with' dropdown and an 'Exclude' button. At the bottom, there is an 'Add term' button with a plus icon, a 'Report cost: 10 DRS credits' label, and a large red 'Search' button. A small notification in the top right corner says 'API integration available.'

**Note:** There is a difference in the “**Exact match**” parameter for domains and subdomains.

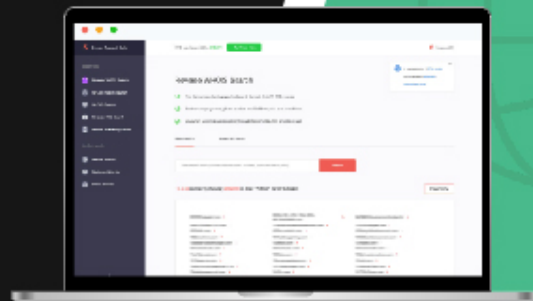

For the subdomain, you can set every term you want, like a word, trademark, company name, and so on, it will work.

For the search through domains, the “**Exact match**” and “**End with**” parameters **should be set as a domain (name+TLD)**, for example, apple.com, due to the fact that the domain name always consists of a name and a TLD.

Find all the domain names  
corresponding to a particular  
search term

Try DRS for free

(no credit card required)

## Get Better Results

The proper combination of the search term itself and the set parameters could give you more relevant results, reduce the manual filtering, and so on.

When setting a search term and adjusting its parameters, you should understand that the term is an integral part of the domain name, and sometimes just one word may not be enough to get a suitable result.

### Subdomains Only Example

You want to get the list of all subdomains to end with the “**iphone**” search term, so you set the search term “**iphone**” with the “**End with**” parameter and set the state “**include**”. Press Search.

Search

This is it! You now have a list of 4,584 subdomains that end with **".iphone"** as a separate term. This should be much closer to what you wanted to get.

The screenshot displays the 'Domain Research Suite' interface. On the left is a dark sidebar with navigation options: 'Reverse WHOIS Search', 'WHOIS History Search', 'WHOIS Search', 'Reverse DNS Search', 'Domain Availability Check', 'Domains & Subdomains Discovery', 'Domain Monitor', 'Registrant Monitor', and 'Brand Monitor'. The main area shows '4,584 domain(s) having your specific search terms found'. A list of domains is displayed in three columns, each with a right-pointing arrow. The domains include various TLDs like .tw, .net, .tech, .br, .cn, .de, .com, .org, .info, .app, and .site. Examples include 'ionsk.iphone.5xs17zt.tw', 'mail.iphone.winnersnow.net', 'twtsl.iphone.62591.tw', 'cpanel.iphone.enforce.com.br', 'jbxxtl.iphone.s9t2hn5.tw', 'www.iphone.freshslice.com', 'www.iphone.al-motamiz.com', 'www.iphone.11162526.cn', 'www.iphone.444art.com', 'www.iphone.acquire-iphone.club', 'www.iphone.ascanz.com', 'www.iphone.bdy9bg.tw', 'www.iphone.coinscheat.club', 'www.iphone.dmsinteractive.com', 'www.iphone.e3mal.com', 'www.iphone.foochow.org', 'www.iphone.glenwaverleyhawks...', 'www.iphone.it-premio.com', 'www.iphone.ogdvxs.cn', 'www.iphone.qggz40.cn', 'www.iphone.quidzone.info', 'www.iphone.sgprice.com', 'www.iphone.smpanters.org', 'www.iphone.thunderviews.com', 'mail.iphone.lakearounennedytried...', 'mail.icloud.iphone.com-login.tech', 'vlgvv.iphone.4warz8f.tw', 'ybtet.iphone.gxarzb3.tw', 'mtayw.iphone.vfnuxwel.cn', 'stalker.iphone.karl-fred-mueller.de', 'www.iphone.hamdouchi.com', 'www.iphone.3317846.cn', 'www.iphone.49139.tw', 'www.iphone.alkaramadubai.com', 'www.iphone.ascngv.cn', 'www.iphone.blogser.net', 'www.iphone.diggerscc.com', 'www.iphone.ds-demo.co.uk', 'www.iphone.exchange.cz', 'www.iphone.freegifts4you.top', 'www.iphone.ideal.it', 'www.iphone.keelebasicbites.com', 'www.iphone.pagegem.com', 'www.iphone.qruin.cn', 'www.iphone.sc4q6jj.tw', 'www.iphone.skyxshop.com', 'www.iphone.tezamviewer.com', 'www.iphone.toopofferz.com', 'mail.iphone.vasepin.site', 'webmail.iphone.lebooks.me', 'webdisk.iphone.enforce.com.br', 'unexw.iphone.13546.tw', 'meuxj.iphone.28024.tw', 'www.iphone.ksherlock.com', 'www.iphone.mauromelis.fr', 'www.iphone.360league.de', 'www.iphone.6267296.cn', 'www.iphone.apeinc.cn', 'www.iphone.baillia.com', 'www.iphone.codemax.us', 'www.iphone.digitalentrance.com', 'www.iphone.dzfndzur.cn', 'www.iphone.fagagc.cn', 'www.iphone.giveaways.network', 'www.iphone.incrxae.cn', 'www.iphone.na-ireland.org', 'www.iphone.plerni.com', 'www.iphone.qsq8e3g.tw', 'www.iphone.sdfn0n.tw', 'www.iphone.sleep.app', 'www.iphone.thebyersfamily.net', and 'www.iphone.vhaobi.cn'.

In the same way, you can use domain research. Just remember that for the **"End With"** and **"Exact match"** options, you **must enter the TLD** in the search box. ([apple.com](https://apple.com), [.com](https://.com), [amazon.com](https://amazon.com), [.uk](https://.uk), etc.)

## Both Domains and Subdomains Example

Let's say you want a list of domain names that contain specific subdomains. For example, you need all domains with the term **"apple"** that contains the **"iphone"** term in the subdomains.

Select the search option **"Both"**
