

Domains & Subdomains Discovery Web Tool Tutorial

Posted on October 1, 2022

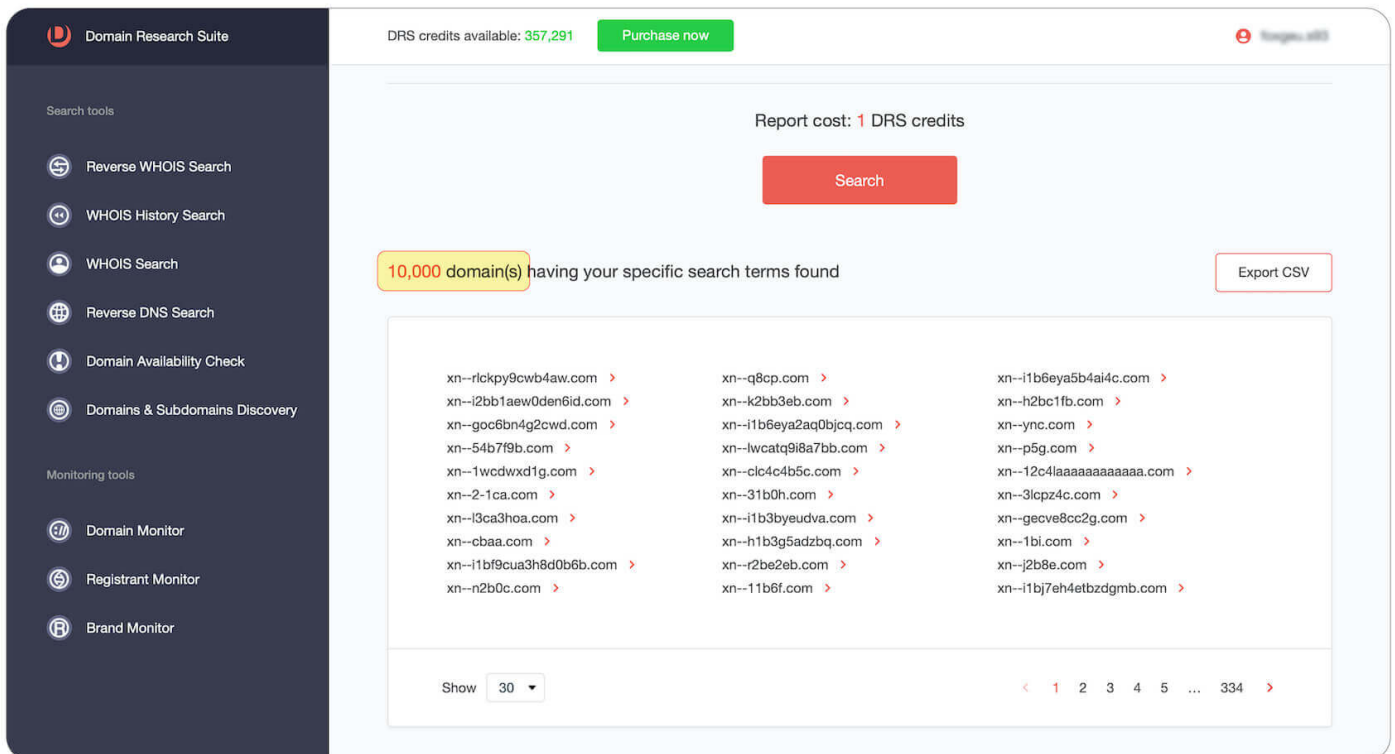

The screenshot shows the 'Domains & Subdomains Discovery' tool interface. On the left is a dark sidebar with navigation options under 'Search tools' and 'Monitoring tools'. The main area is light blue and contains the following elements:

- Top right: 'DRS credits available: 357,292' and a green 'Purchase now' button.
- Top right: 'API integration available.' notification box.
- Section title: 'Domains & Subdomains Discovery'.
- Instruction: 'Find domains/subdomains containing specific search terms in their hostnames.' with a green checkmark.
- Filters: Radio buttons for 'Domains only' (selected), 'Subdomains only', and 'Both'. An 'Added since' field with a calendar icon and 'optional' text.
- Search input: A text box labeled 'Included search term'.
- Options: A 'Starts with' dropdown menu and an 'Include' toggle switch.
- Action: 'Add term +' button.
- Cost: 'Report cost: 1 DRS credits'.
- Submit: A red 'Search' button.

Domains & Subdomains Discovery Lookup allows you to identify all domains and subdomains that contain all the **Include terms** and **none of the Exclude terms**. You can discover **domains only**, **subdomains only**, or **both**. Also, you can specify where the search term should be placed in the domain name: **start with**, **end with**, **contains**, **contains the word**, to narrow down the results according to your needs.

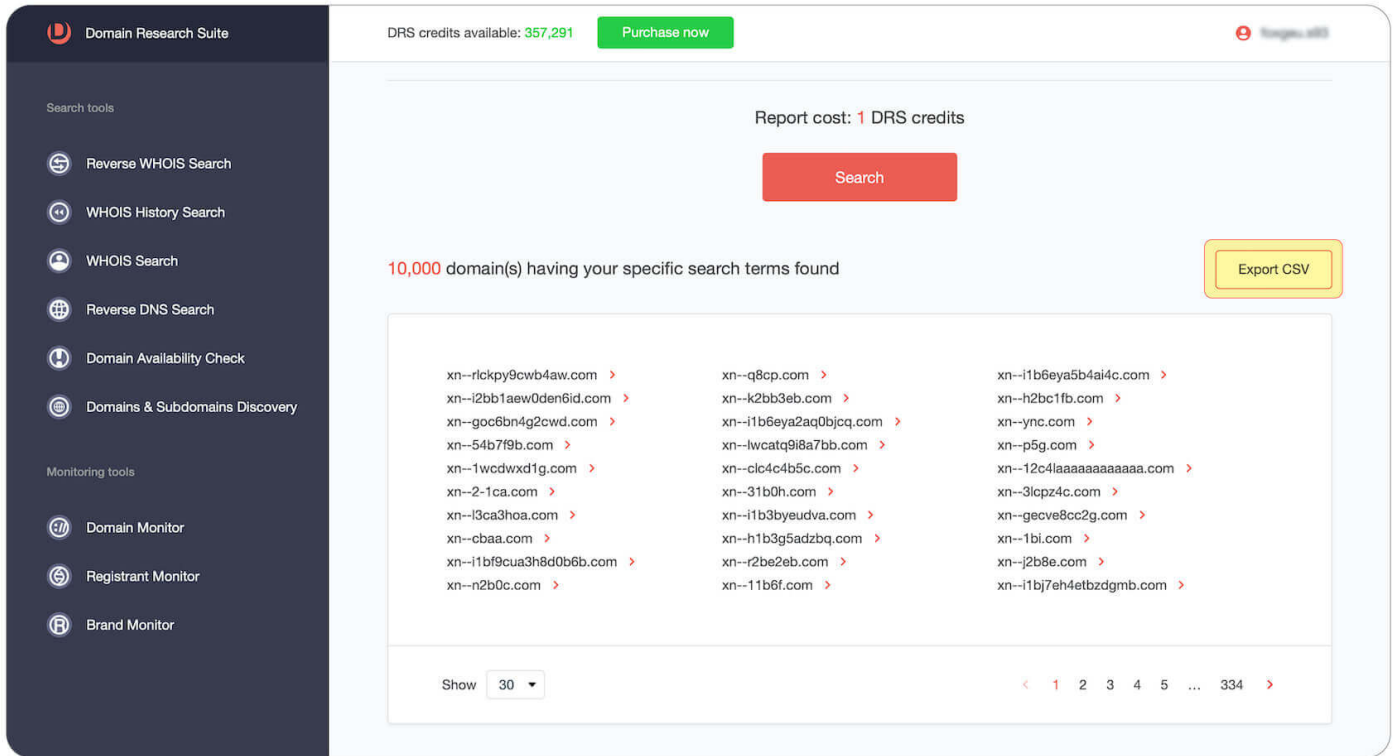

Domains & Subdomains Discovery Lookup allows you to identify all domains and subdomains that contain all the **Include terms** and **none of the Exclude terms**. You can discover **domains only**, **subdomains only**, or **both**. Also, you can specify where the search term should be placed in the domain name: **start with**, **end with**, **contains**, **exact match**, to narrow down the results according to your needs.

The output result is limited to 10,000 terms.

The screenshot displays the 'Domain Research Suite' interface. On the left is a dark sidebar with navigation options: 'Search tools' (Reverse WHOIS Search, WHOIS History Search, WHOIS Search, Reverse DNS Search) and 'Monitoring tools' (Domain Availability Check, Domain Monitor, Registrant Monitor, Brand Monitor). The main area shows 'DRS credits available: 357,291' and a 'Purchase now' button. Below this, it states 'Report cost: 1 DRS credits' and a 'Search' button. A yellow callout box indicates '10,000 domain(s) having your specific search terms found'. An 'Export CSV' button is visible. The search results are presented in a grid of 30 domain names, each with a right-pointing arrow. The domains listed include: xn--rlckpy9cwb4aw.com, xn--i2bb1aew0den6id.com, xn--goc6bn4g2cwwd.com, xn--54b7f9b.com, xn--1wcdwxd1g.com, xn--2-1ca.com, xn--l3ca3hoa.com, xn--cbaa.com, xn--i1bf9cua3h8d0b6b.com, xn--n2b0c.com, xn--q8cp.com, xn--k2bb3eb.com, xn--i1b6eya2aq0bjcq.com, xn--lwcatq9i8a7bb.com, xn--clc4c4b5c.com, xn--31b0h.com, xn--i1b3byeudva.com, xn--h1b3g5adz bq.com, xn--r2be2eb.com, xn--11b6f.com, xn--i1b6eya5b4ai4c.com, xn--h2bc1fb.com, xn--ync.com, xn--p5g.com, xn--12c4laaaaaaaaaaaaa.com, xn--3lcpz4c.com, xn--gecve8cc2g.com, xn--1bi.com, xn--j2b8e.com, and xn--i1bj7eh4etbzdgm.com. At the bottom, there is a 'Show 30' dropdown and a pagination bar with numbers 1, 2, 3, 4, 5, and 334.

You can download the search result as a CSV file.

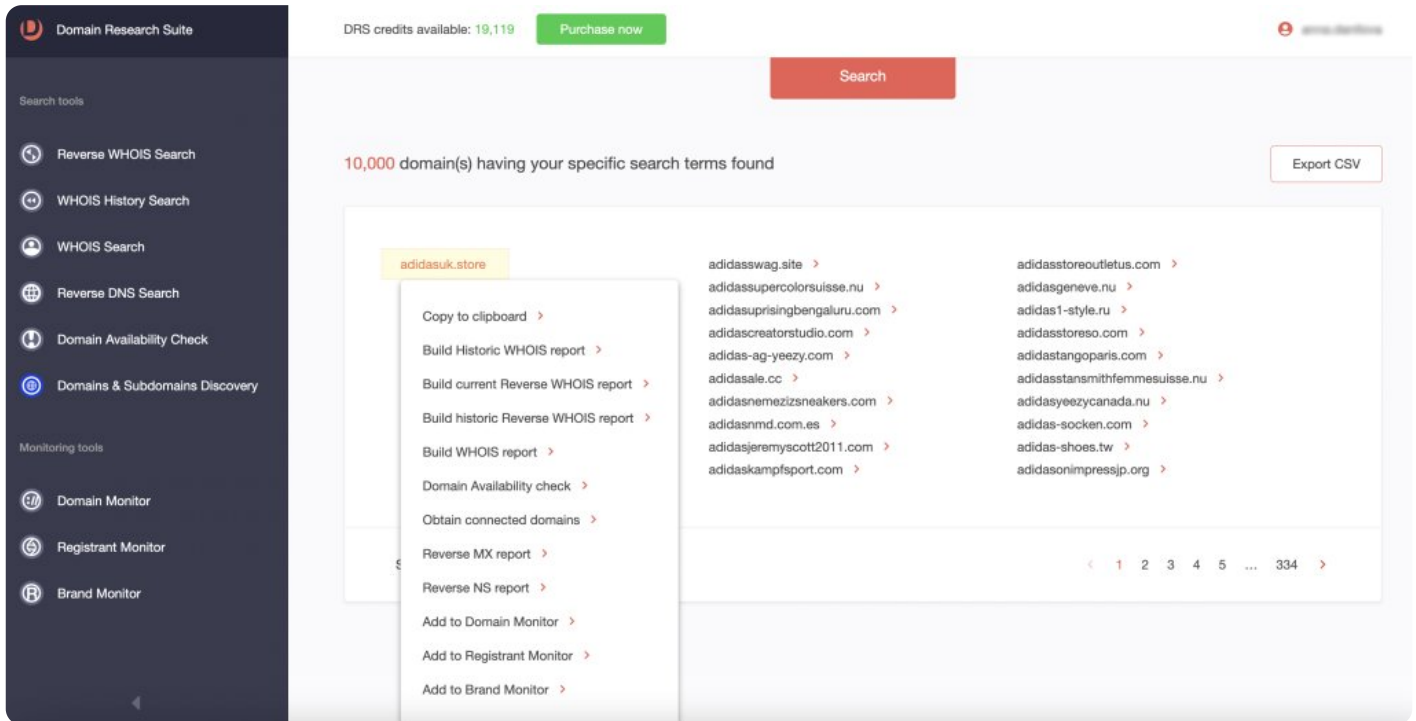

The screenshot displays the 'Domain Research Suite' interface. At the top, it shows 'DRS credits available: 357,291' and a 'Purchase now' button. The main content area features a search bar with a 'Search' button and a report cost of '1 DRS credits'. Below the search bar, it states '10,000 domain(s) having your specific search terms found' and includes an 'Export CSV' button. The search results are presented in a grid of domain names, each with a right-pointing arrow. The domains listed include:

- xn--rlckpy9cwb4aw.com
- xn--i2bb1aew0den6id.com
- xn--goc6bn4g2c wd.com
- xn--54b7f9b.com
- xn--1wcdwxd1g.com
- xn--2-1ca.com
- xn--i3ca3hoa.com
- xn--cbaa.com
- xn--i1b19cua3h8d0b6b.com
- xn--n2b0c.com
- xn--q8cp.com
- xn--k2bb3eb.com
- xn--i1b6eya2aq0bjcq.com
- xn--lwcatq9i8a7bb.com
- xn--clc4c4b5c.com
- xn--31b0h.com
- xn--i1b3byeudva.com
- xn--h1b3g5adz bq.com
- xn--r2be2eb.com
- xn--11b6f.com
- xn--i1b6eya5b4ai4c.com
- xn--h2bc1fb.com
- xn--ync.com
- xn--p5g.com
- xn--12c4iaaaaaaaaaa.com
- xn--3lcpz4c.com
- xn--gecve8cc2g.com
- xn--1bi.com
- xn--j2b8e.com
- xn--i1bj7eh4etbzd gmb.com

At the bottom of the results list, there is a 'Show' dropdown menu set to '30' and a pagination control showing '1 2 3 4 5 ... 334'.

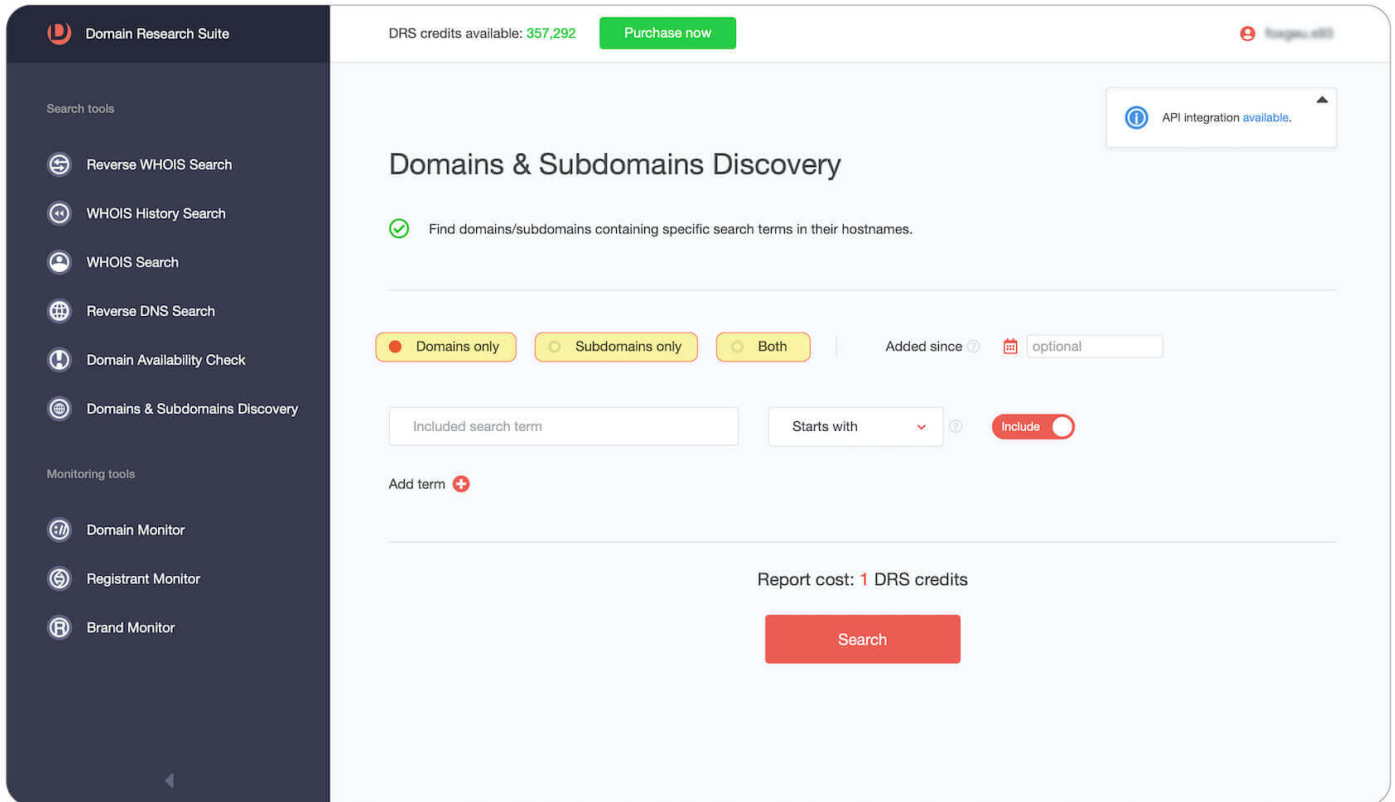

For every domain/subdomain from the list, you can do **extended research** like Historic WHOIS report, Domain availability check, and so on. To do this, just click on the item in the list.

Search Options

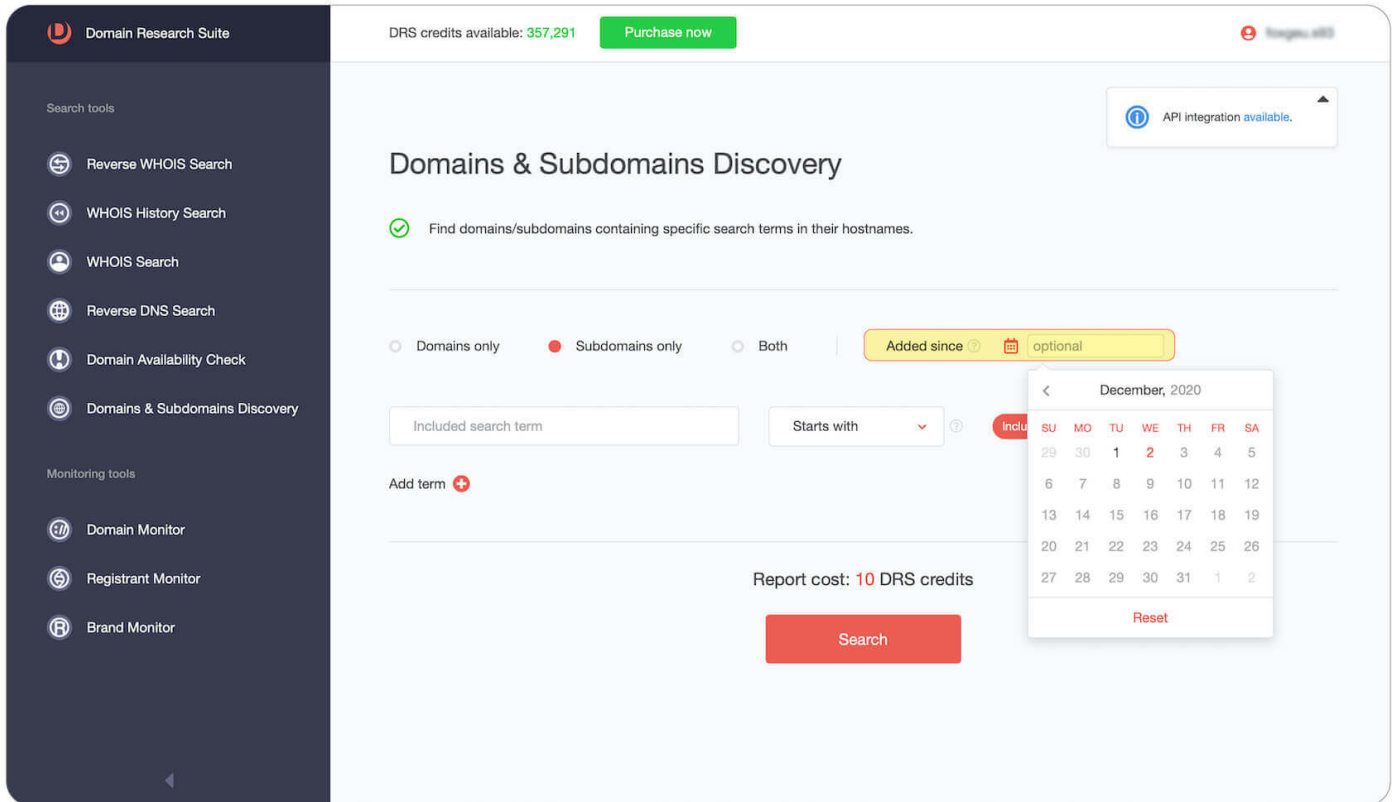

There are 3 search options allowed:

- Search through domain names only;
- Search through subdomains only;
- Search through both domains and subdomains.

The screenshot shows the 'Domains & Subdomains Discovery' tool in the Domain Research Suite. The interface includes a sidebar with navigation options, a top bar with DRS credits (357,292) and a 'Purchase now' button, and a main search area. The search area features a title, a description, radio buttons for 'Domains only', 'Subdomains only', and 'Both', an 'Added since' field with a calendar icon, an 'Included search term' input, a 'Starts with' dropdown, an 'Include' toggle, and an 'Add term' button. A 'Search' button is at the bottom, and the report cost is indicated as 1 DRS credits. An 'API integration available' notification is in the top right.

For every option, you are allowed to set the “**Since date**” parameter to narrow down the search result. Only the domains/subdomains discovered since the given date will be shown.

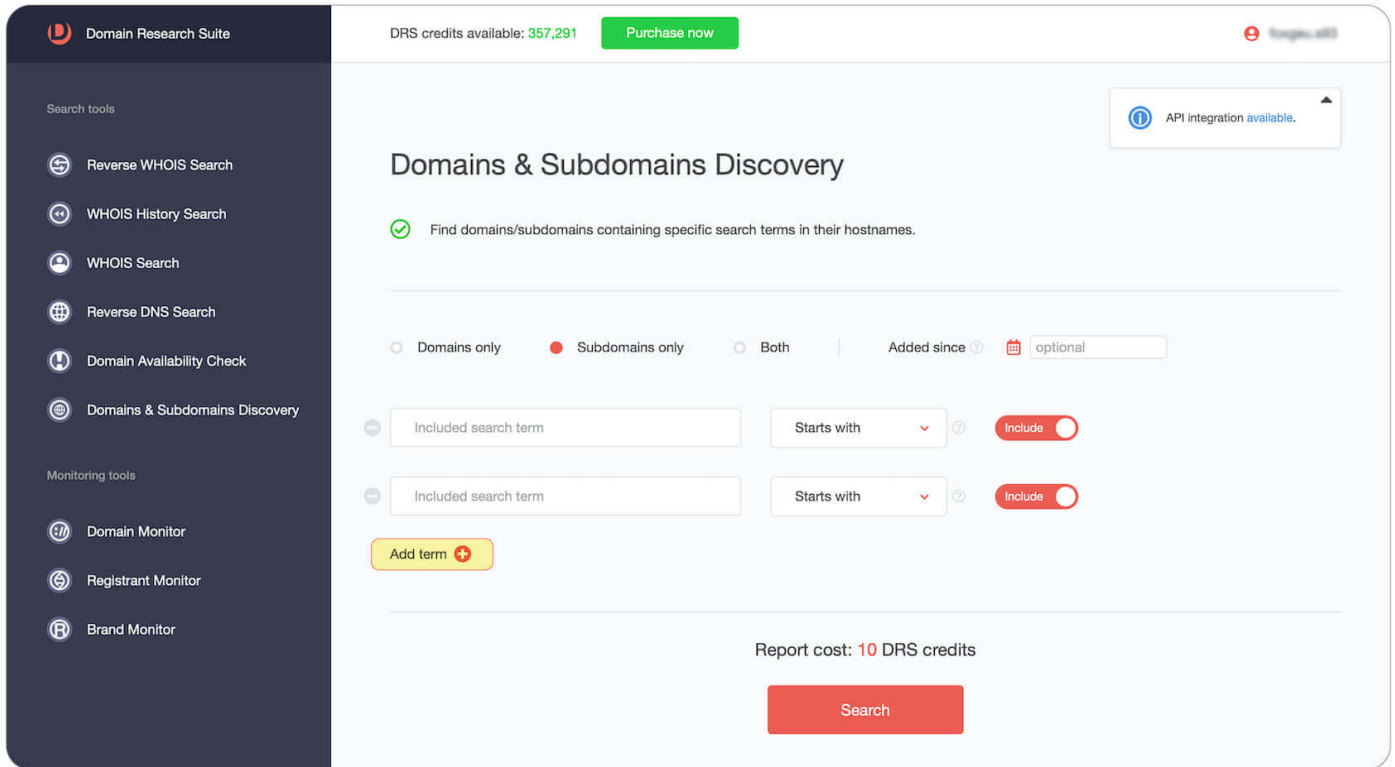

The screenshot shows the 'Domains & Subdomains Discovery' page in the Domain Research Suite. The interface includes a sidebar with navigation options, a top bar with DRS credits (357,291) and a 'Purchase now' button, and a main content area. The main area features a search form with radio buttons for 'Domains only', 'Subdomains only', and 'Both'. There is an 'Included search term' input field, a 'Starts with' dropdown menu, and an 'Add term +' button. A calendar widget is open, showing 'December, 2020' with a 'Reset' button. A 'Report cost: 10 DRS credits' is displayed, and a red 'Search' button is at the bottom. A notification bubble in the top right corner states 'API integration available.'

Search Terms

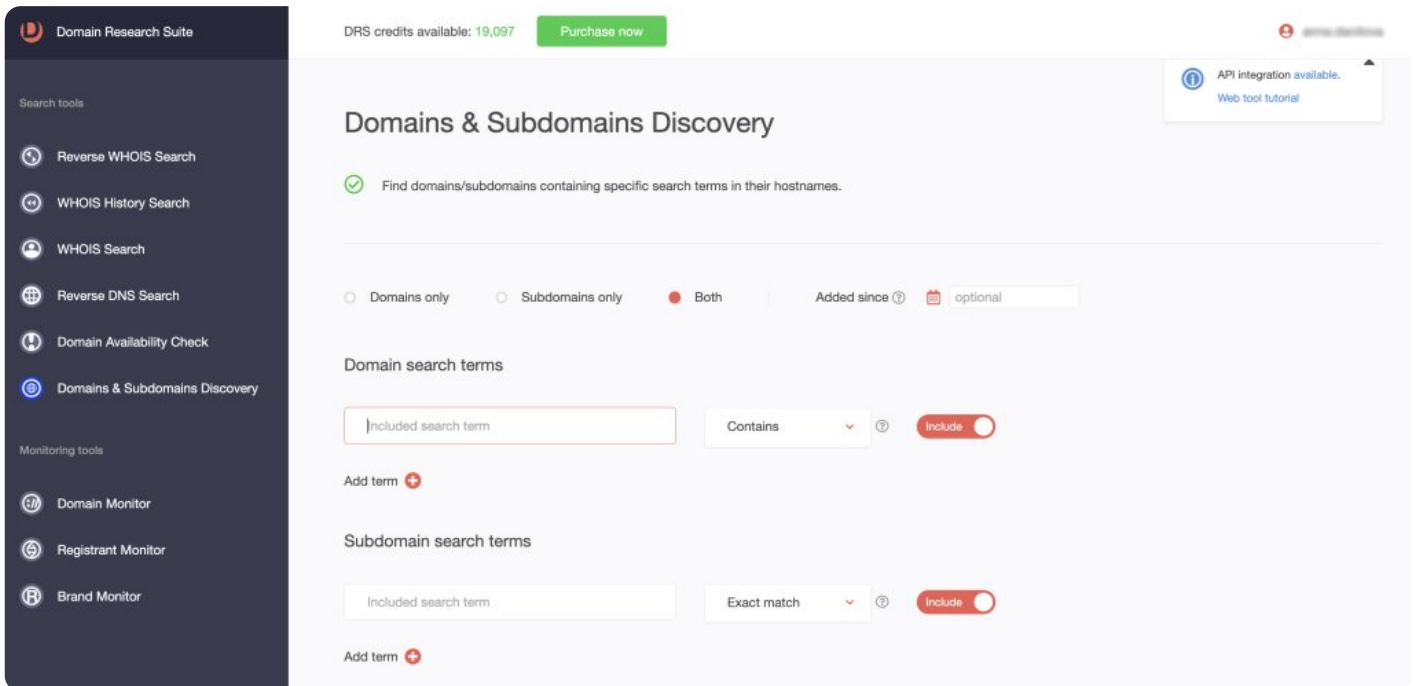

For each type of search, you specify special search terms.

You are allowed to set several search terms by clicking on “+” **Add term** button.

The screenshot shows the 'Domains & Subdomains Discovery' tool in the Domain Research Suite. The interface includes a sidebar with navigation options, a top header with credit information, and a main search area. The search area features radio buttons for 'Domains only', 'Subdomains only', and 'Both'. Below these are two search input fields, each with a 'Starts with' dropdown and an 'Include' toggle. An 'Add term' button is located below the search fields. At the bottom, the report cost is shown as '10 DRS credits' and a 'Search' button is present.

For Domains only and Subdomains only searches the interface looks the same, except that for the type **"Both"** you set several search terms for the domain and subdomain at the same time.

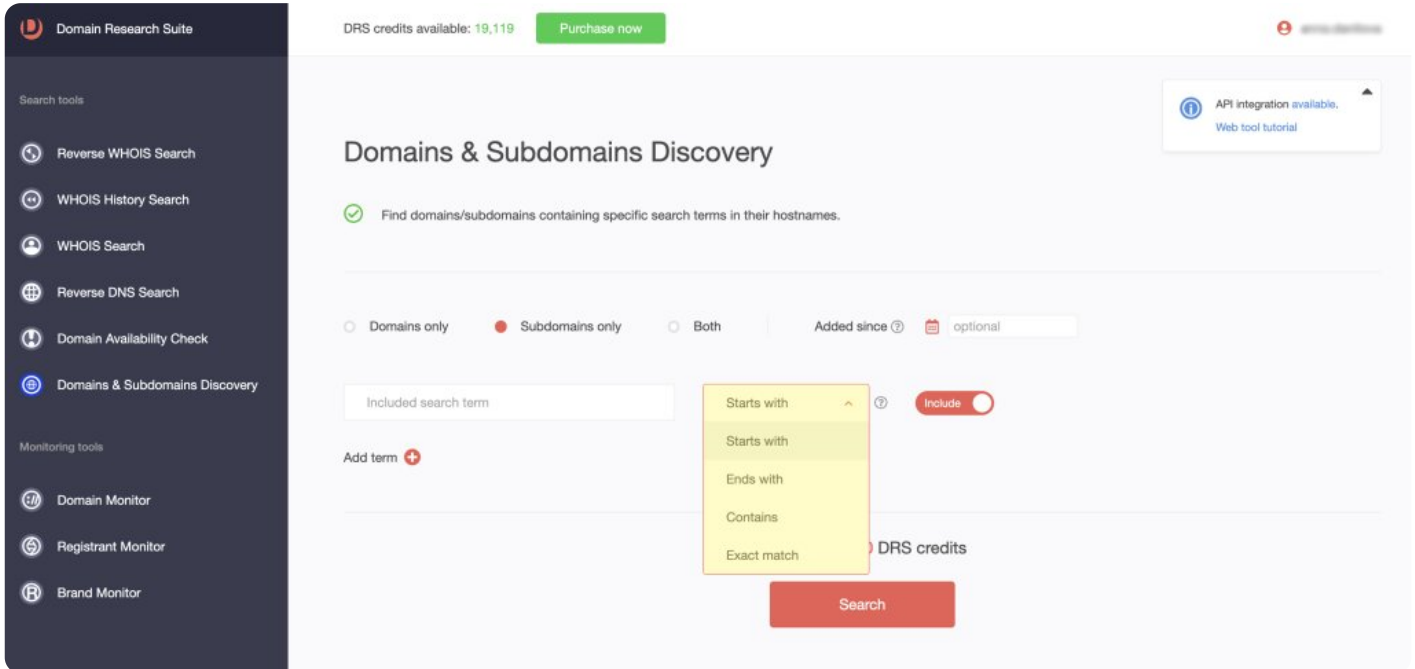

The screenshot shows the 'Domains & Subdomains Discovery' tool interface. On the left is a dark sidebar with navigation options: 'Reverse WHOIS Search', 'WHOIS History Search', 'WHOIS Search', 'Reverse DNS Search', 'Domain Availability Check', 'Domains & Subdomains Discovery' (highlighted), 'Domain Monitor', 'Registrant Monitor', and 'Brand Monitor'. The main content area has a header 'Domains & Subdomains Discovery' and a sub-header 'Find domains/subdomains containing specific search terms in their hostnames.' Below this are search filters: 'Domains only', 'Subdomains only', and 'Both' (selected), along with an 'Added since' field set to 'optional'. There are two search term sections: 'Domain search terms' and 'Subdomain search terms'. Each section has an input field, a dropdown menu (set to 'Contains' and 'Exact match' respectively), and an 'Include' toggle switch. An 'Add term' button is present below each section. A top navigation bar shows 'DRS credits available: 19,097' and a 'Purchase now' button. A notification bubble in the top right corner says 'API integration available. Web tool tutorial'.

Search Terms Options

For every search term, you can set the type and state.

Search term types

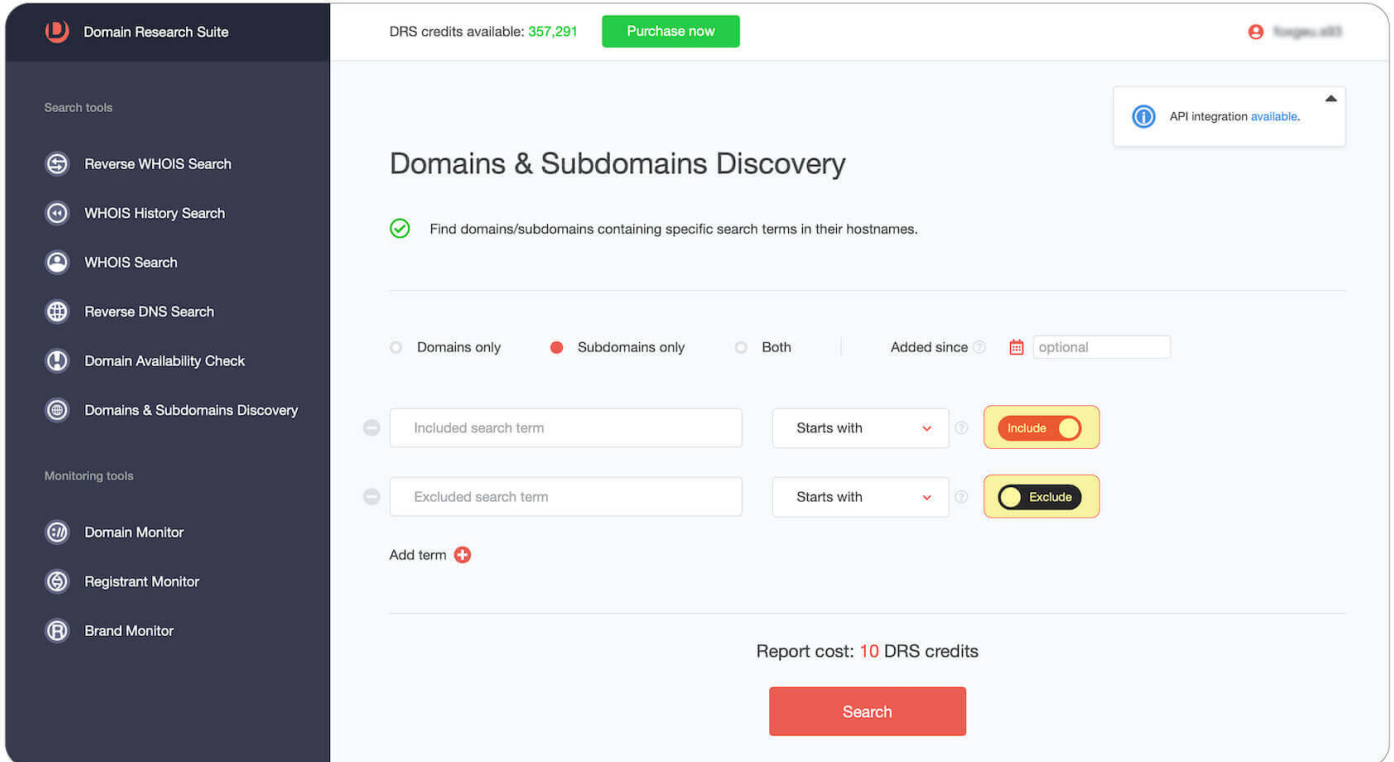

- **Start with** - domain/subdomain starts with this term (search term*)
- **End with** - domain/subdomain ends with this term (*search term)
- **Contains** - domain/subdomain contains this term (*search term*)
- **Exact match** - domain/subdomain exactly matches this term (*search term*)

The screenshot shows the 'Domains & Subdomains Discovery' tool interface. On the left is a dark sidebar with navigation options under 'Search tools' (Reverse WHOIS Search, WHOIS History Search, WHOIS Search, Reverse DNS Search, Domain Availability Check, Domains & Subdomains Discovery) and 'Monitoring tools' (Domain Monitor, Registrant Monitor, Brand Monitor). The main area has a header with 'DRS credits available: 19,119' and a 'Purchase now' button. Below the header is the tool title 'Domains & Subdomains Discovery' and a green checkmark icon with the text 'Find domains/subdomains containing specific search terms in their hostnames.' The interface includes radio buttons for 'Domains only', 'Subdomains only', and 'Both', along with an 'Added since' field set to 'optional'. A search input field contains 'Included search term'. A dropdown menu is open, showing options: 'Starts with' (selected), 'Starts with', 'Ends with', 'Contains', and 'Exact match'. To the right of the dropdown is an 'Include' toggle switch. Below the dropdown is a 'DRS credits' label and a red 'Search' button.

Search term state

- **Include** - all domains/subdomains should include the search term.
- **Exclude** - every domain/subdomain with the given search term will be excluded from the search result.

The screenshot shows the 'Domains & Subdomains Discovery' interface. At the top, it displays 'DRS credits available: 357,291' and a 'Purchase now' button. A notification bubble indicates 'API integration available.'. The main heading is 'Domains & Subdomains Discovery' with a subtext: 'Find domains/subdomains containing specific search terms in their hostnames.'. Below this, there are radio buttons for 'Domains only', 'Subdomains only' (which is selected), and 'Both'. To the right, there is an 'Added since' field with a calendar icon and the text 'optional'. The search configuration section includes two rows: 'Included search term' with a 'Starts with' dropdown and an 'Include' toggle; and 'Excluded search term' with a 'Starts with' dropdown and an 'Exclude' toggle. Below these is an 'Add term' button with a plus sign. At the bottom, it shows 'Report cost: 10 DRS credits' and a large red 'Search' button.

Note: There is a difference in the “**Exact match**” parameter for domains and subdomains.

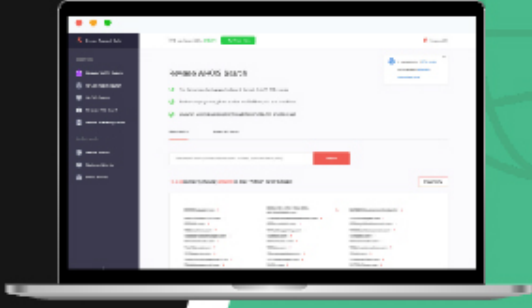

For the subdomain, you can set every term you want, like a word, trademark, company name, and so on, it will work.

For the search through domains, the “**Exact match**” and “**End with**” parameters **should be set as a domain (name+TLD)**, for example, apple.com, due to the fact that the domain name always consists of a name and a TLD.

Find all the domain names corresponding to a particular search term

Try DRS for free

(no credit card required)

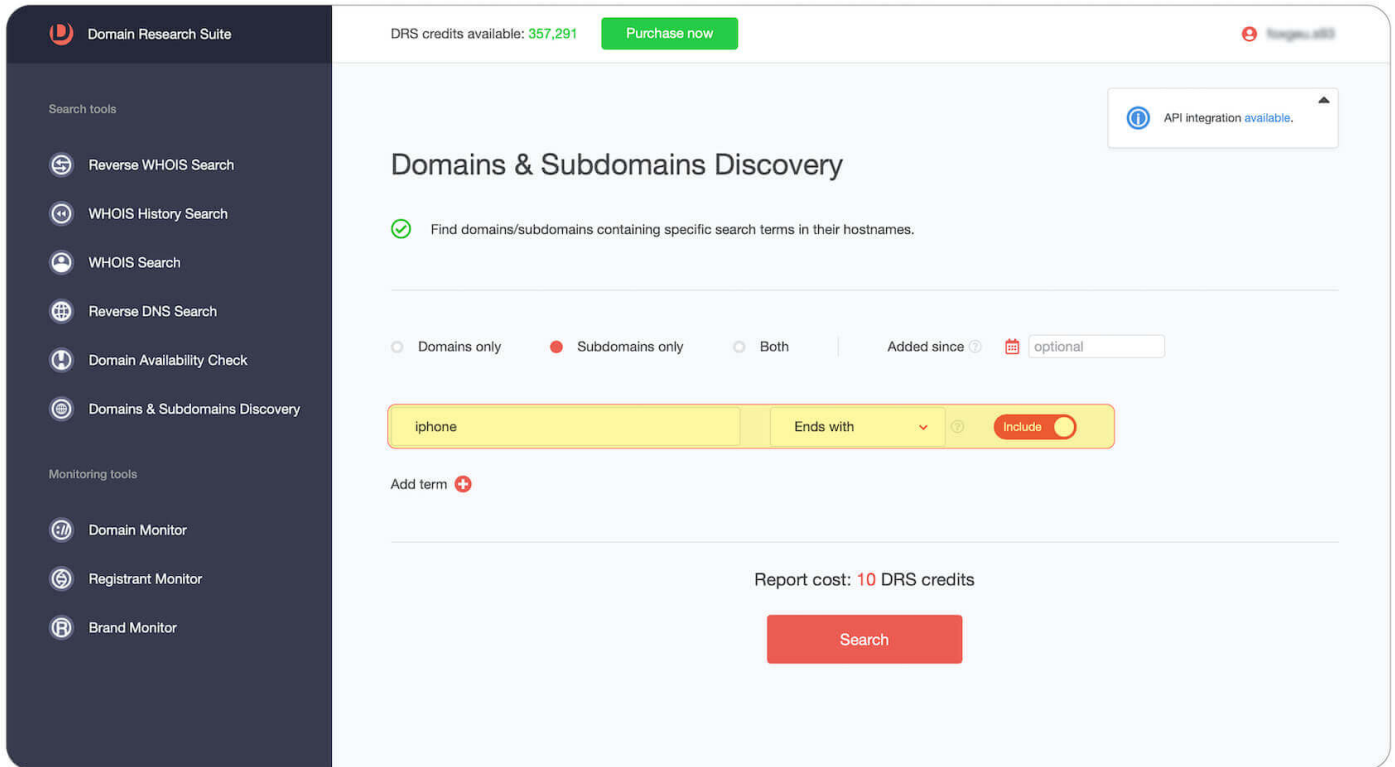

Get Better Results

The proper combination of the search term itself and the set parameters could give you more relevant results, reduce the manual filtering, and so on.

When setting a search term and adjusting its parameters, you should understand that the term is an integral part of the domain name, and sometimes just one word may not be enough to get a suitable result.

Subdomains Only Example

You want to get the list of all subdomains to end with the “**iphone**” search term, so you set the search term “**iphone**” with the “**End with**” parameter and set the state “**include**”. Press Search.

The screenshot shows the 'Domains & Subdomains Discovery' tool in the Domain Research Suite. The interface includes a sidebar with navigation options, a top header with credit information, and a main search area. The search criteria are set to 'Subdomains only' with the term 'iphone' and the filter 'Ends with'. The report cost is 10 DRS credits.

[Search](#)

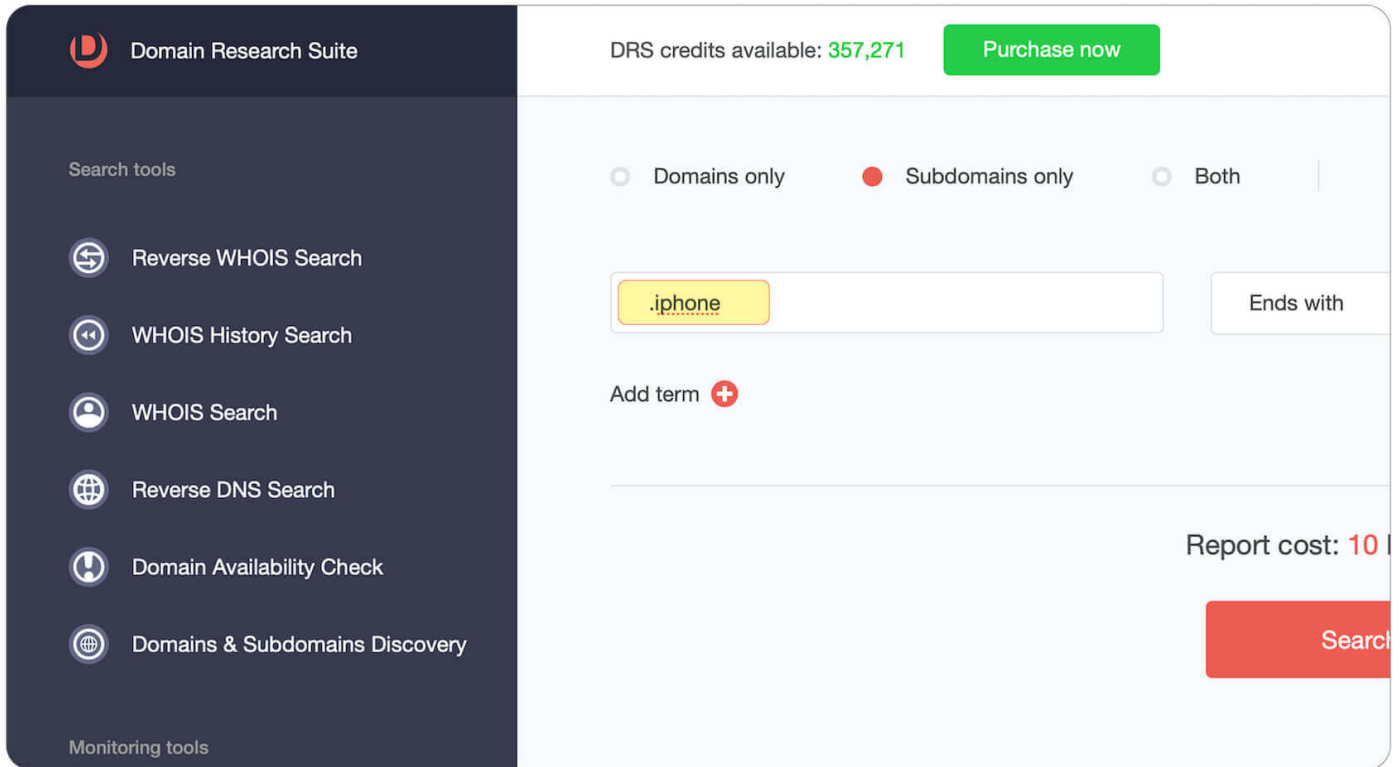

As a result, you will get a list of more than 10,000 items. In addition, the list exceeds the limit and some of the subdomains you are interested in are missing, and there are many domains, for example, `jeremyiphone.domain.edu`, which most likely have nothing to do with iPhone.

The screenshot displays the 'Domain Research Suite' interface. At the top, it shows 'DRS credits available: 357,281' and a 'Purchase now' button. The main content area shows a search result for 'iphone' with a 'Report cost: 10 DRS credits' and a 'Search' button. Below this, it states '10,000 domain(s) having your specific search terms found' and includes an 'Export CSV' button. The search results are displayed in a grid format, showing various domain names such as 'cpcalendars.claimhpihone.boxu...', 'mail.claimhpihone.boxuc13.com', 'webdisk.claimhpihone.boxuc13...', 'jiubaziiphone.168tools.com', 'jiubaziiphone.wi799.com', 'jacquelesiphone.oneonta.edu', 'jennifeisiphone.uncg.edu', 'jennygaosiphone.rockefeller.edu', 'jackietkiiphone.uncg.edu', 'jaimebatsiphone.umh.edu', 'jakespizsiphone.plymouth.edu', 'jeffreys-iphone.uncg.edu', 'jer-emile-iphone.nmsu.edu', 'jermainsiphone.ncat.edu', 'jeromes-iphone.rockefeller.edu', 'jesses-iphone.uncg.edu', 'jessicatsiphone.truman.edu', 'jeremiahsiphone.memphis.edu', 'jessicassiphone.umh.edu', 'jessies-iphone.umh.edu', 'jerods-iphone.truman.edu', 'jlc-iphone.rockefeller.edu', 'jianbaosiphone.uncg.edu', 'jilliansiphone.plymouth.edu', 'jichens-iphone.truman.edu', 'jeffde-iphone.uncg.edu', 'ishidaknoiphone.asahikawa-med...', 'iphone.306aaaa.com', and 'iphone.4get2.com'. At the bottom of the results, there is a 'Show 30' dropdown menu and a pagination control showing '1 2 3 4 5 ... 334'.

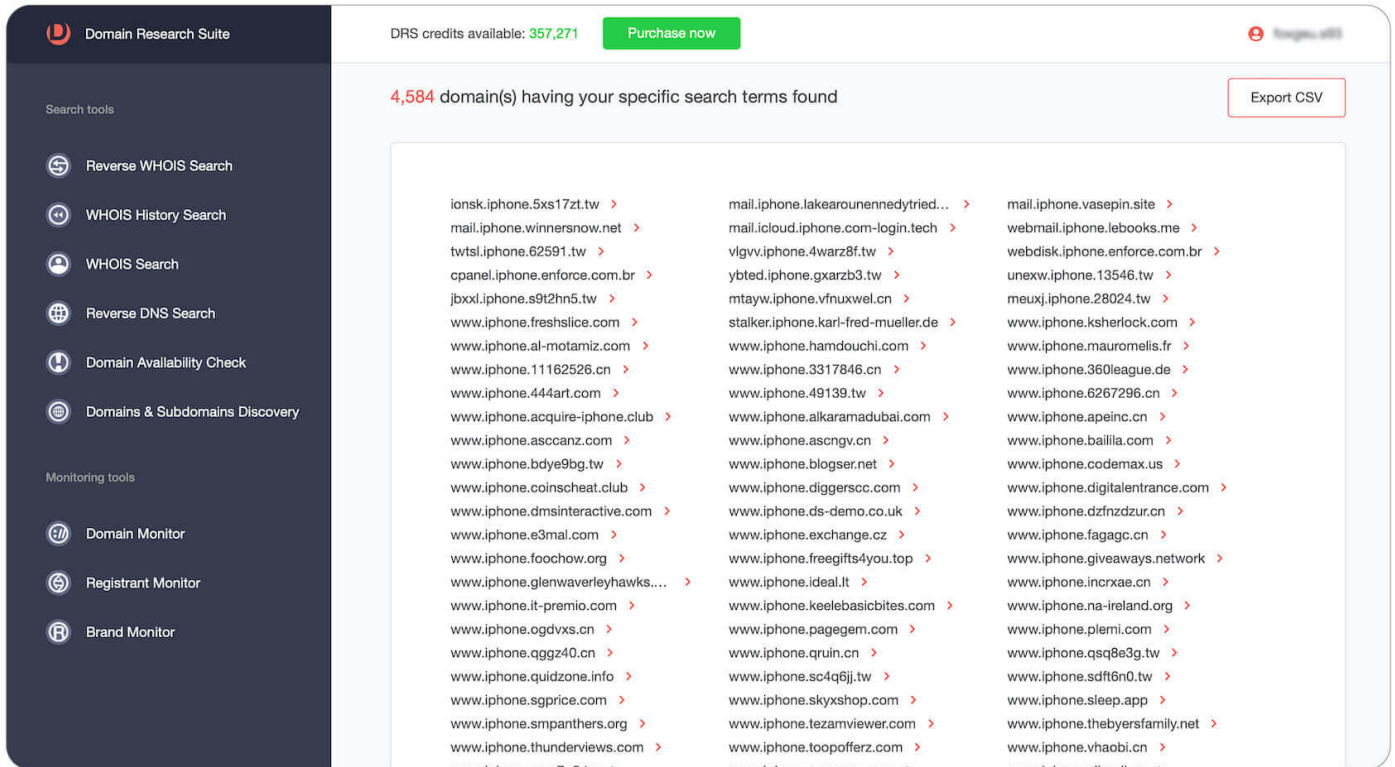

What Do You Have to Do to Get a Better Result?

Not too much! Just put a **dot** before "iphone" ? **".iphone"**.

The screenshot shows the 'Domain Research Suite' interface. On the left is a dark sidebar with 'Search tools' and 'Monitoring tools' sections. The main area shows 'DRS credits available: 357,271' and a 'Purchase now' button. Search options include 'Domains only', 'Subdomains only' (selected), and 'Both'. A search input field contains '.iphone' and is followed by an 'Ends with' button. Below the input is an 'Add term +' button. At the bottom right, a 'Report cost: 10' is visible next to a red 'Search' button.

This is it! You now have a list of 4,584 subdomains that end with **".iphone"** as a separate term. This should be much closer to what you wanted to get.

The screenshot shows the 'Domain Research Suite' interface. At the top, it indicates 'DRS credits available: 357,271' and a 'Purchase now' button. Below this, a message states '4,584 domain(s) having your specific search terms found' with an 'Export CSV' button. The main content area displays a grid of domain names, each with a right-pointing arrow. The domains listed include:

In the same way, you can use domain research. Just remember that for the **"End With"** and **"Exact match"** options, you **must enter the TLD** in the search box. (apple.com, .com, amazon.com, .uk, etc.)

Both Domains and Subdomains Example

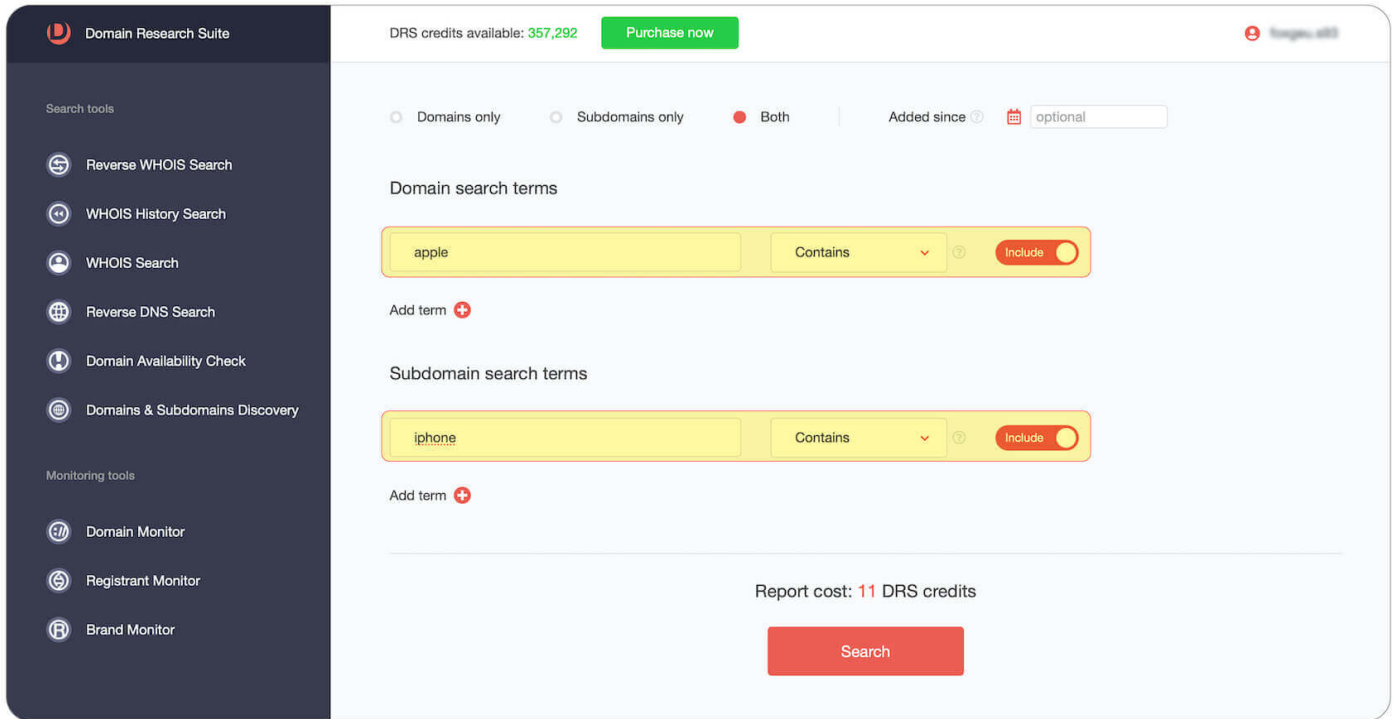

Let's say you want a list of domain names that contain specific subdomains. For example, you need all domains with the term **"apple"** that contains the **"iphone"** term in the subdomains.

Select the search option **"Both"**

The screenshot shows the 'Domains & Subdomains Discovery' interface. On the left is a dark sidebar with navigation options: 'Domain Research Suite' (selected), 'Search tools' (Reverse WHOIS Search, WHOIS History Search, WHOIS Search, Reverse DNS Search, Domain Availability Check, Domains & Subdomains Discovery), and 'Monitoring tools' (Domain Monitor, Registrant Monitor, Brand Monitor). The main content area has a top bar with 'DRS credits available: 357,292' and a 'Purchase now' button. Below this is a search configuration section with radio buttons for 'Domains only', 'Subdomains only', and 'Both' (selected). There is also an 'Added since' field with a calendar icon and the text 'optional'. Two search term sections are visible: 'Domain search terms' and 'Subdomain search terms'. Each section has an 'Included search term' input field, a 'Starts with' dropdown menu, and an 'Include' toggle switch. Below each section is an 'Add term' button with a plus sign.

To get the most extended list, put the term **“apple”** in the domains field with the option **“Contains”**, and the **“iphone”** term in the subdomains field with the same option.

Report cost: 11 DRS credits

Search

As a result, you will get a list of 413 domains.

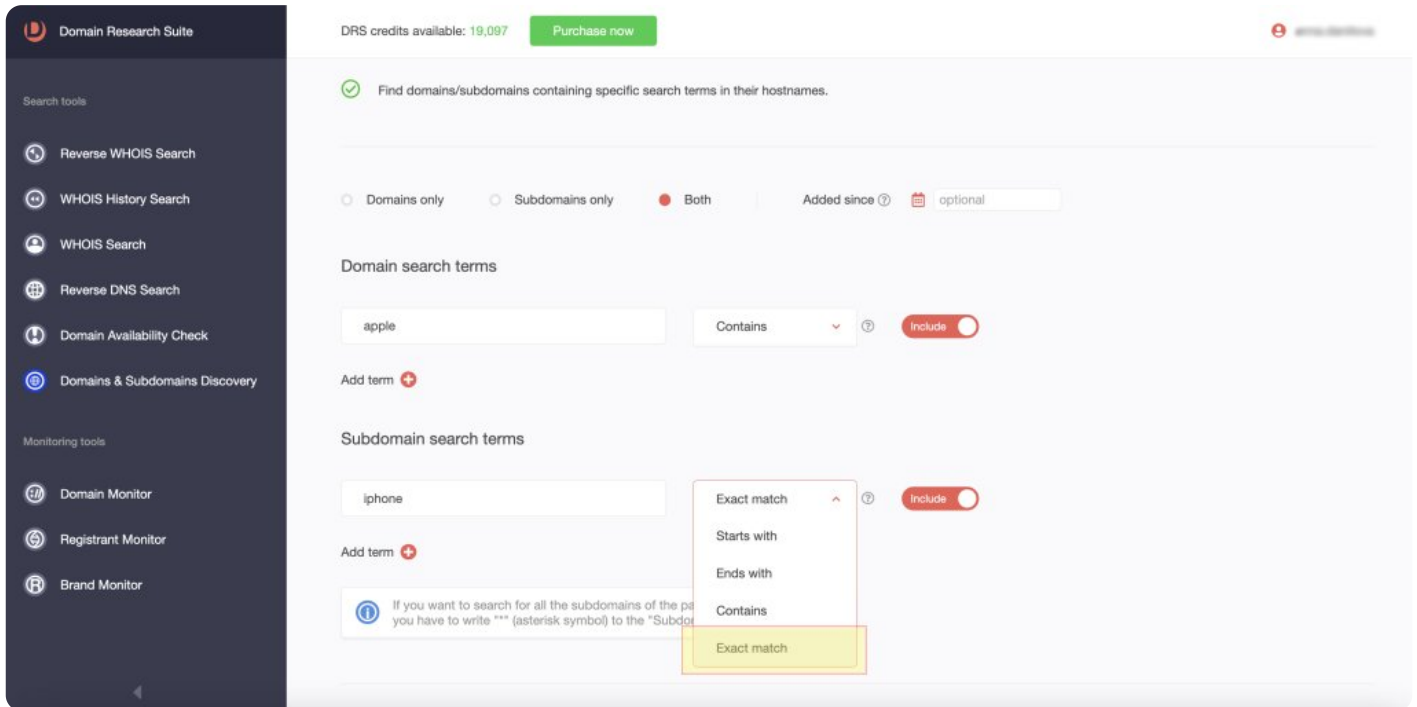

The screenshot displays the Domain Research Suite interface. At the top, it shows 'DRS credits available: 357,292' and a 'Purchase now' button. The main content area features a search bar with a 'Search' button and a report cost of 11 DRS credits. Below the search bar, it states '413 domain(s) having your specific search terms found' and includes an 'Export CSV' button. The search results are presented in a grid of 15 domain names, each with a right-pointing arrow. The domains listed are:

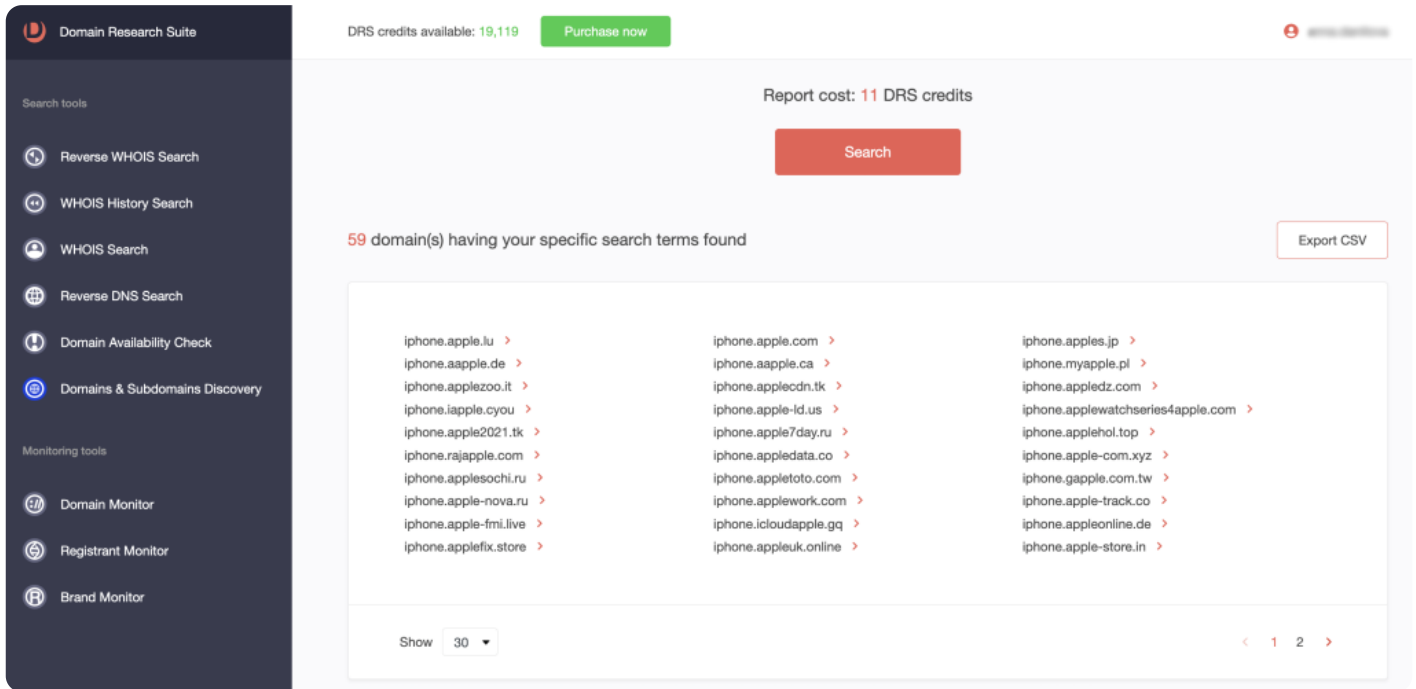

iphone.apple.lu >	iphone.apple.com >	iphone.apples.jp >
iphonex.apple.ovh >	iphone.myapple.pl >	iphone6.apple18.ru >
iphone.applezoo.it >	iphone.apple7day.ru >	iphone8.apple18.ru >
www.iphone.apple.lu >	iphone.applehol.top >	iphone.rajapple.com >
iphone8.apple18.pro >	iphonex.apple18.ru >	iphone-ld.apple.com >
buyiphone4.apple.com >	buyiphone2.apple.com >	iphone.applesochi.ru >
iphone.appletoto.com >	iphone.gapple.com.tw >	iphonexs.apple18.ru >
iphone-7.applepub.fr >	iphonex.apple18.pro >	iphone7.appleua.biz >
buyiphone.apple.com >	iphonexr.apple18.ru >	buyiphone7.apple.com >
buyiphone3.apple.com >	buyiphone9.apple.com >	www.iphone.apple.com >

At the bottom of the results area, there is a 'Show' dropdown menu set to '30' and a pagination control showing '1 2 3 4 5 ... 14 >'.

You are allowed to narrow down the list by setting different options for the search terms. As an example, set the “**Exact match**“ option for the subdomains search term.

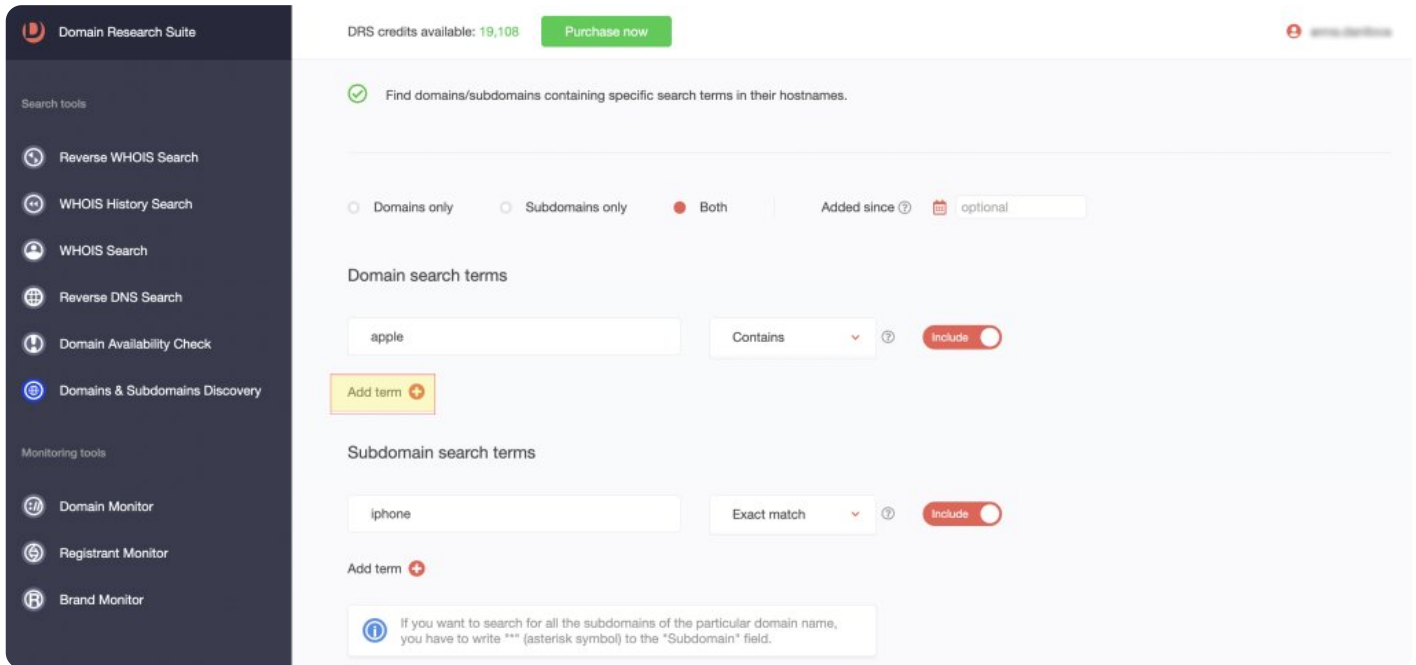

You have got a list of 59 domains.

The screenshot shows the Domain Research Suite interface. At the top, it displays "DRS credits available: 19,119" and a "Purchase now" button. The main area shows a search report for "Report cost: 11 DRS credits" with a "Search" button. Below this, it states "59 domain(s) having your specific search terms found" and includes an "Export CSV" button. The search results are displayed in a grid format, listing various domain names such as "iphone.apple.lu", "iphone.apple.com", and "iphone.apples.jp". A "Show 30" dropdown menu is visible at the bottom left of the results area, and pagination controls are at the bottom right.

You can narrow down the list even further. As an example, we decided to get the list for **.com TLD only**. To do this, we just have to add the second search term for the domains search, by clicking “+” under the search field.
