

# Registrant Monitor Web Tool Tutorial

Posted on October 19, 2022

The screenshot shows the 'Registrant Monitor' interface. At the top, it displays 'DRS credits available: 7,055' and a 'Purchase now' button. The main heading is 'Registrant Monitor'. Below this, there are three green checkmarks with descriptions: 1. Monitor domain registrations, updates, renewals or expirations made by registrants matching search criteria. 2. Enter the registrant's Name, Company name, Email, Phone/Fax, Postal Address or City/Country as monitoring terms. 3. Get ideas for search terms from the current Registrant details retrieved by using our WHOIS Search tool. A search input field with the placeholder 'Enter registrant search term' and an 'Add to monitoring' button is present. Below the search field, it shows '2 active monitors'. A table lists the active monitors with columns for 'Include terms', 'Exclude terms', 'Last monitored', and 'Last changed'. One monitor is listed with the term 'sales', which is 'Queued for monitoring' and has 'No changes detected for the last 2 weeks'. A 'Download JSON' button is located at the top right of the table.

Domain Research Suite

DRS credits available: 7,055 [Purchase now](#)

## Registrant Monitor

- Monitor domain registrations, updates, renewals or expirations made by registrants matching search criteria.
- Enter the registrant's Name, Company name, Email, Phone/Fax, Postal Address or City/Country as monitoring terms.
- Get ideas for search terms from the current Registrant details retrieved by using our [WHOIS Search](#) tool.

Enter registrant search term [Add to monitoring](#)

<input type="checkbox"/> sales		Queued for monitoring ⓘ	No changes detected for the last 2 weeks <a href="#">Edit monitor</a>

[Download JSON](#)

This tool allows you to monitor domain registrations, updates, renewals or expirations made by registrants according to search criteria.

## Adding the Search Terms

Enter the registrant's Name, Company name, Email, Phone/Fax, Postal Address, or City/Country as monitoring terms. Click on “**Add to monitoring**“ to start monitoring the search terms. At first, your monitor will be queued for the monitoring, and the data will appear on the next day. **Please note:** *we monitor changes once a day the data will appear in 24 hours.*

The screenshot shows the 'Registrant Monitor' interface. It includes a list of instructions, a search input field with 'admin@google.com' and an 'Add to monitoring' button, a credit cost warning, and a table of active monitors.

**Registrant Monitor**

- ✓ Monitor domain registrations, updates, renewals or expirations made by registrants matching search criteria.
- ✓ Enter the registrant's Name, Company name, Email, Phone/Fax, Postal Address or City/Country as monitoring terms.
- ✓ Get ideas for search terms from the current Registrant details retrieved by using our [WHOIS Search](#) tool.

## Monitors' Output

## Fields definition

- Include terms - all the include terms must be present in the domain's registrant details.
- Exclude terms - none of the exclude terms can be present in the domain's registrant details.
- Last monitored - the date the monitoring was run last time (typically we check for changes once a day).
- Last changed - the date when changes were last detected.

## Indicators definition

- Queued for monitoring - no data allowed yet. The data will appear within 24 hours after the creation of the monitors.
- No changes detected - the monitor hasn't detected any changes yet.
- View changes - changes were detected.

## Edit Monitor

For every monitor, you can add, delete, include and exclude search terms. At least one search term should be the “**Include**“. You are allowed to add up to 4 “**include**” and 4 “**exclude**” terms.

To add the search term just click on the “**Add term**“, input the term into the term field, and set the type **include** or **exclude**. When all is set, click “**Save**“.

For every item on the list, with the other **DRS tools** you are allowed to build a report like **WHOIS** and **Historic WHOIS** or add the domain of your interest to **Domain monitor** to track changes in its WHOIS and so on.

The screenshot displays a web interface for monitoring domain changes. On the left, a sidebar titled "Change(s) by date" lists dates from Oct 14, 2022, to Oct 18, 2022. The main content area is titled "Monitor changes on October 18, 2022". It is divided into three sections: "Domains added: 2" (listing viperwatersolutions.au and thegooglestore.ae), "Domains updated: 25" (listing stadia.ie, googlecalendar.cl, google.com.tw, 1hourpersecond.com, mandaint.com, mandiant.com, mandriant.com, fireeye-mandiant.com, googlepayment.cl, and googlepayments.cl), and "Domains dropped: 3" (with hackinglooker.com highlighted in a red box). A dropdown menu is open for the highlighted domain, offering actions such as "Copy to clipboard", "Build Historic WHOIS report", "Build current Reverse WHOIS report", "Build historic Reverse WHOIS report", "Build WHOIS report", "Domain Availability check", "Obtain connected domains", "Reverse MX report", "Reverse NS report", "Add to Domain Monitor", "Add to Registrant Monitor", and "Add to Brand Monitor". At the bottom, a section for "Monitor changes on October 17, 2022" is partially visible.

*Your turn to have fun with Registrant Monitor! You can access this tool and others [here](#).*
